2D Topology | Figure 8: fixed-input state extension; tonic-only = autonomous
A
State persistence (L=0; four stages)
Response peak normalized rate
Extended time (ms)
R1 forced
R1 tonic_only
R2 forced
R2 tonic_only
R3 forced
R3 tonic_only
R4 forced
R4 tonic_only
B
Distance to sampled readout state
L2 distance
Extended time (ms)
C
Full-state velocity
L2 rate / ms
Extended time (ms)
D
Endpoint continuous field residual
||f(r)||2 per ms
Snapshot / fixed-input condition
E
Euler map local spectral radius
rho(I + dt J)
Snapshot / condition
F
Distinct random-start endpoints (deduplicated)
Initial-state experiment
Initial-state experiment
Full-state L2 distance
