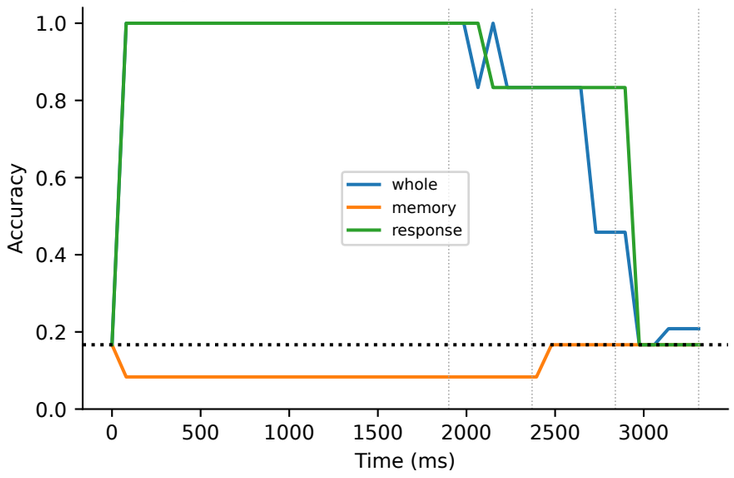
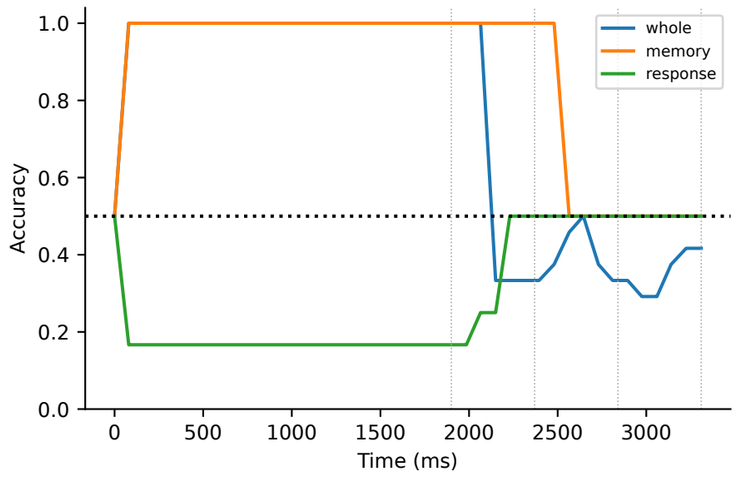
Figure 7 | ring | fixed E/I decompression

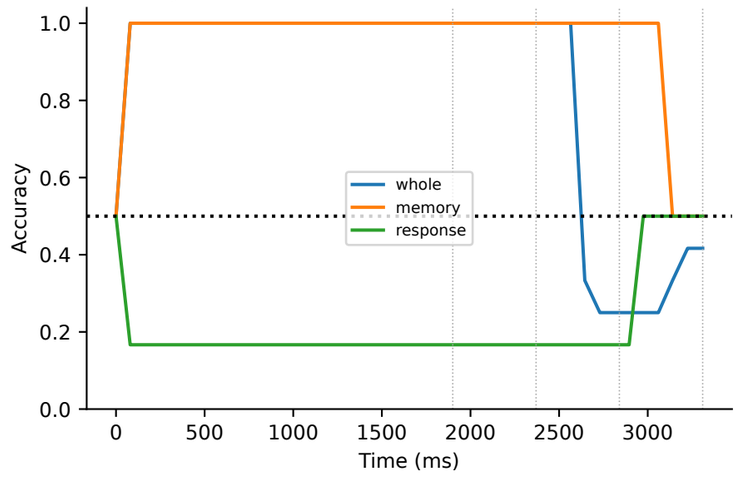
A L: disjoint task-condition folds



D: disjoint task-condition folds



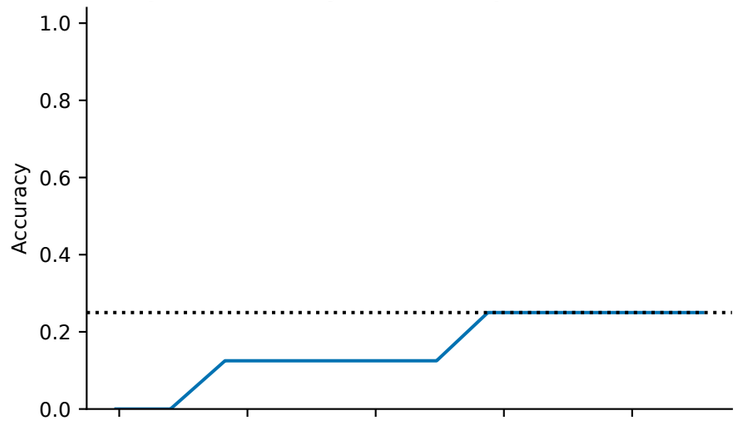
S: disjoint task-condition folds



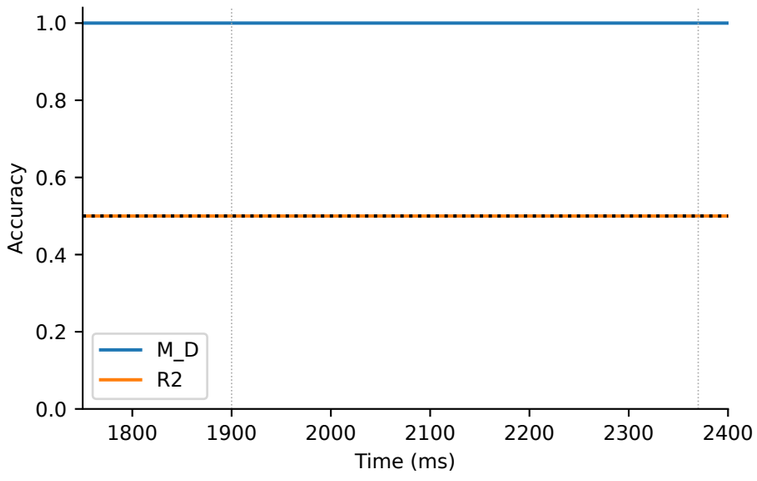
B D cross-temporal, whole network

S cross-temporal, whole network

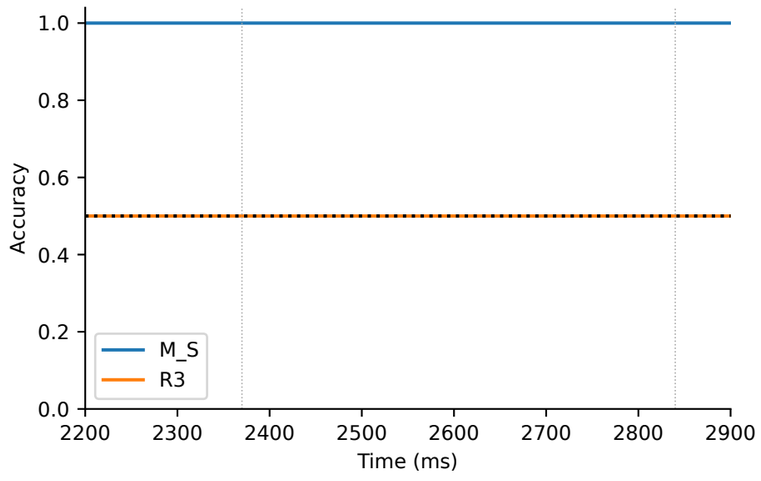
Response four-way D/S branch probe



C D handoff: held-out task conditions



S handoff: held-out task conditions



Two distinct questions

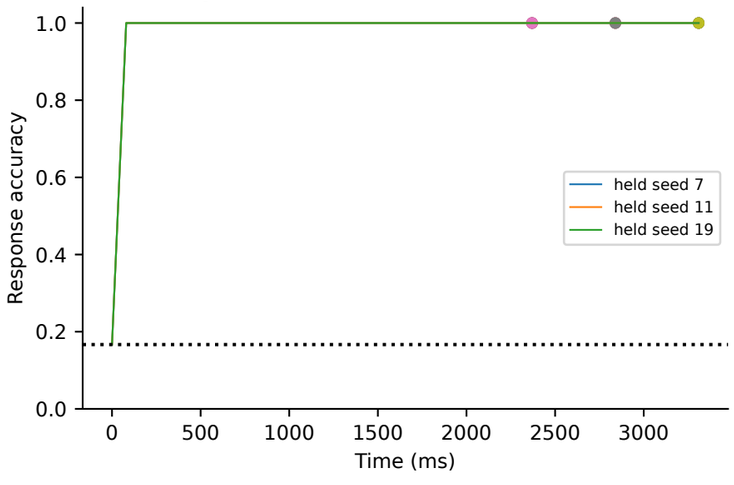
Baseline: unseen LDS tuples

Noise: seen tuples, unseen noise seed

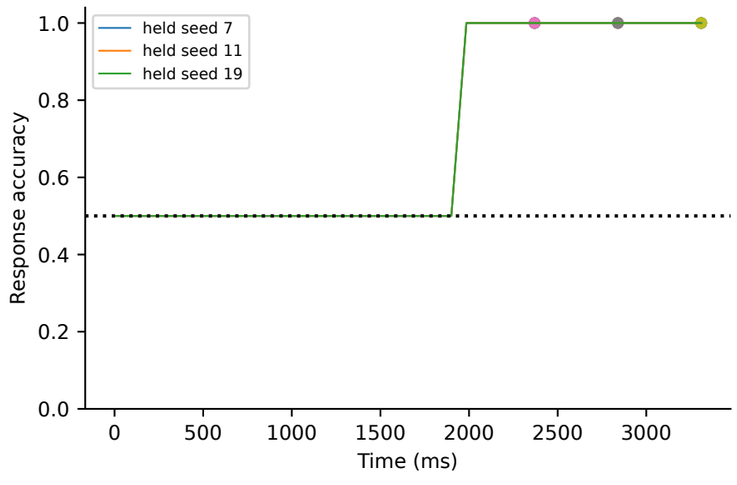
Four-way branch labels are defined only after R3 transfer.

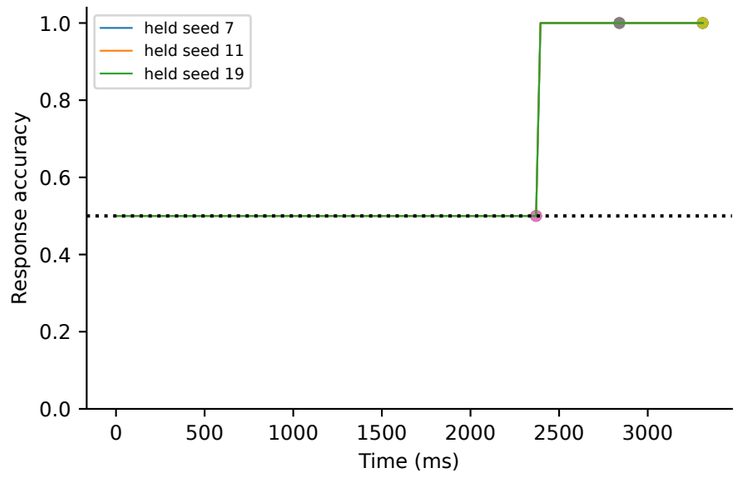
Low memory amplitude can remain linearly readable. No erasure claim.

D L: independent noise realization



D: independent noise realization





S: independent noise realization
