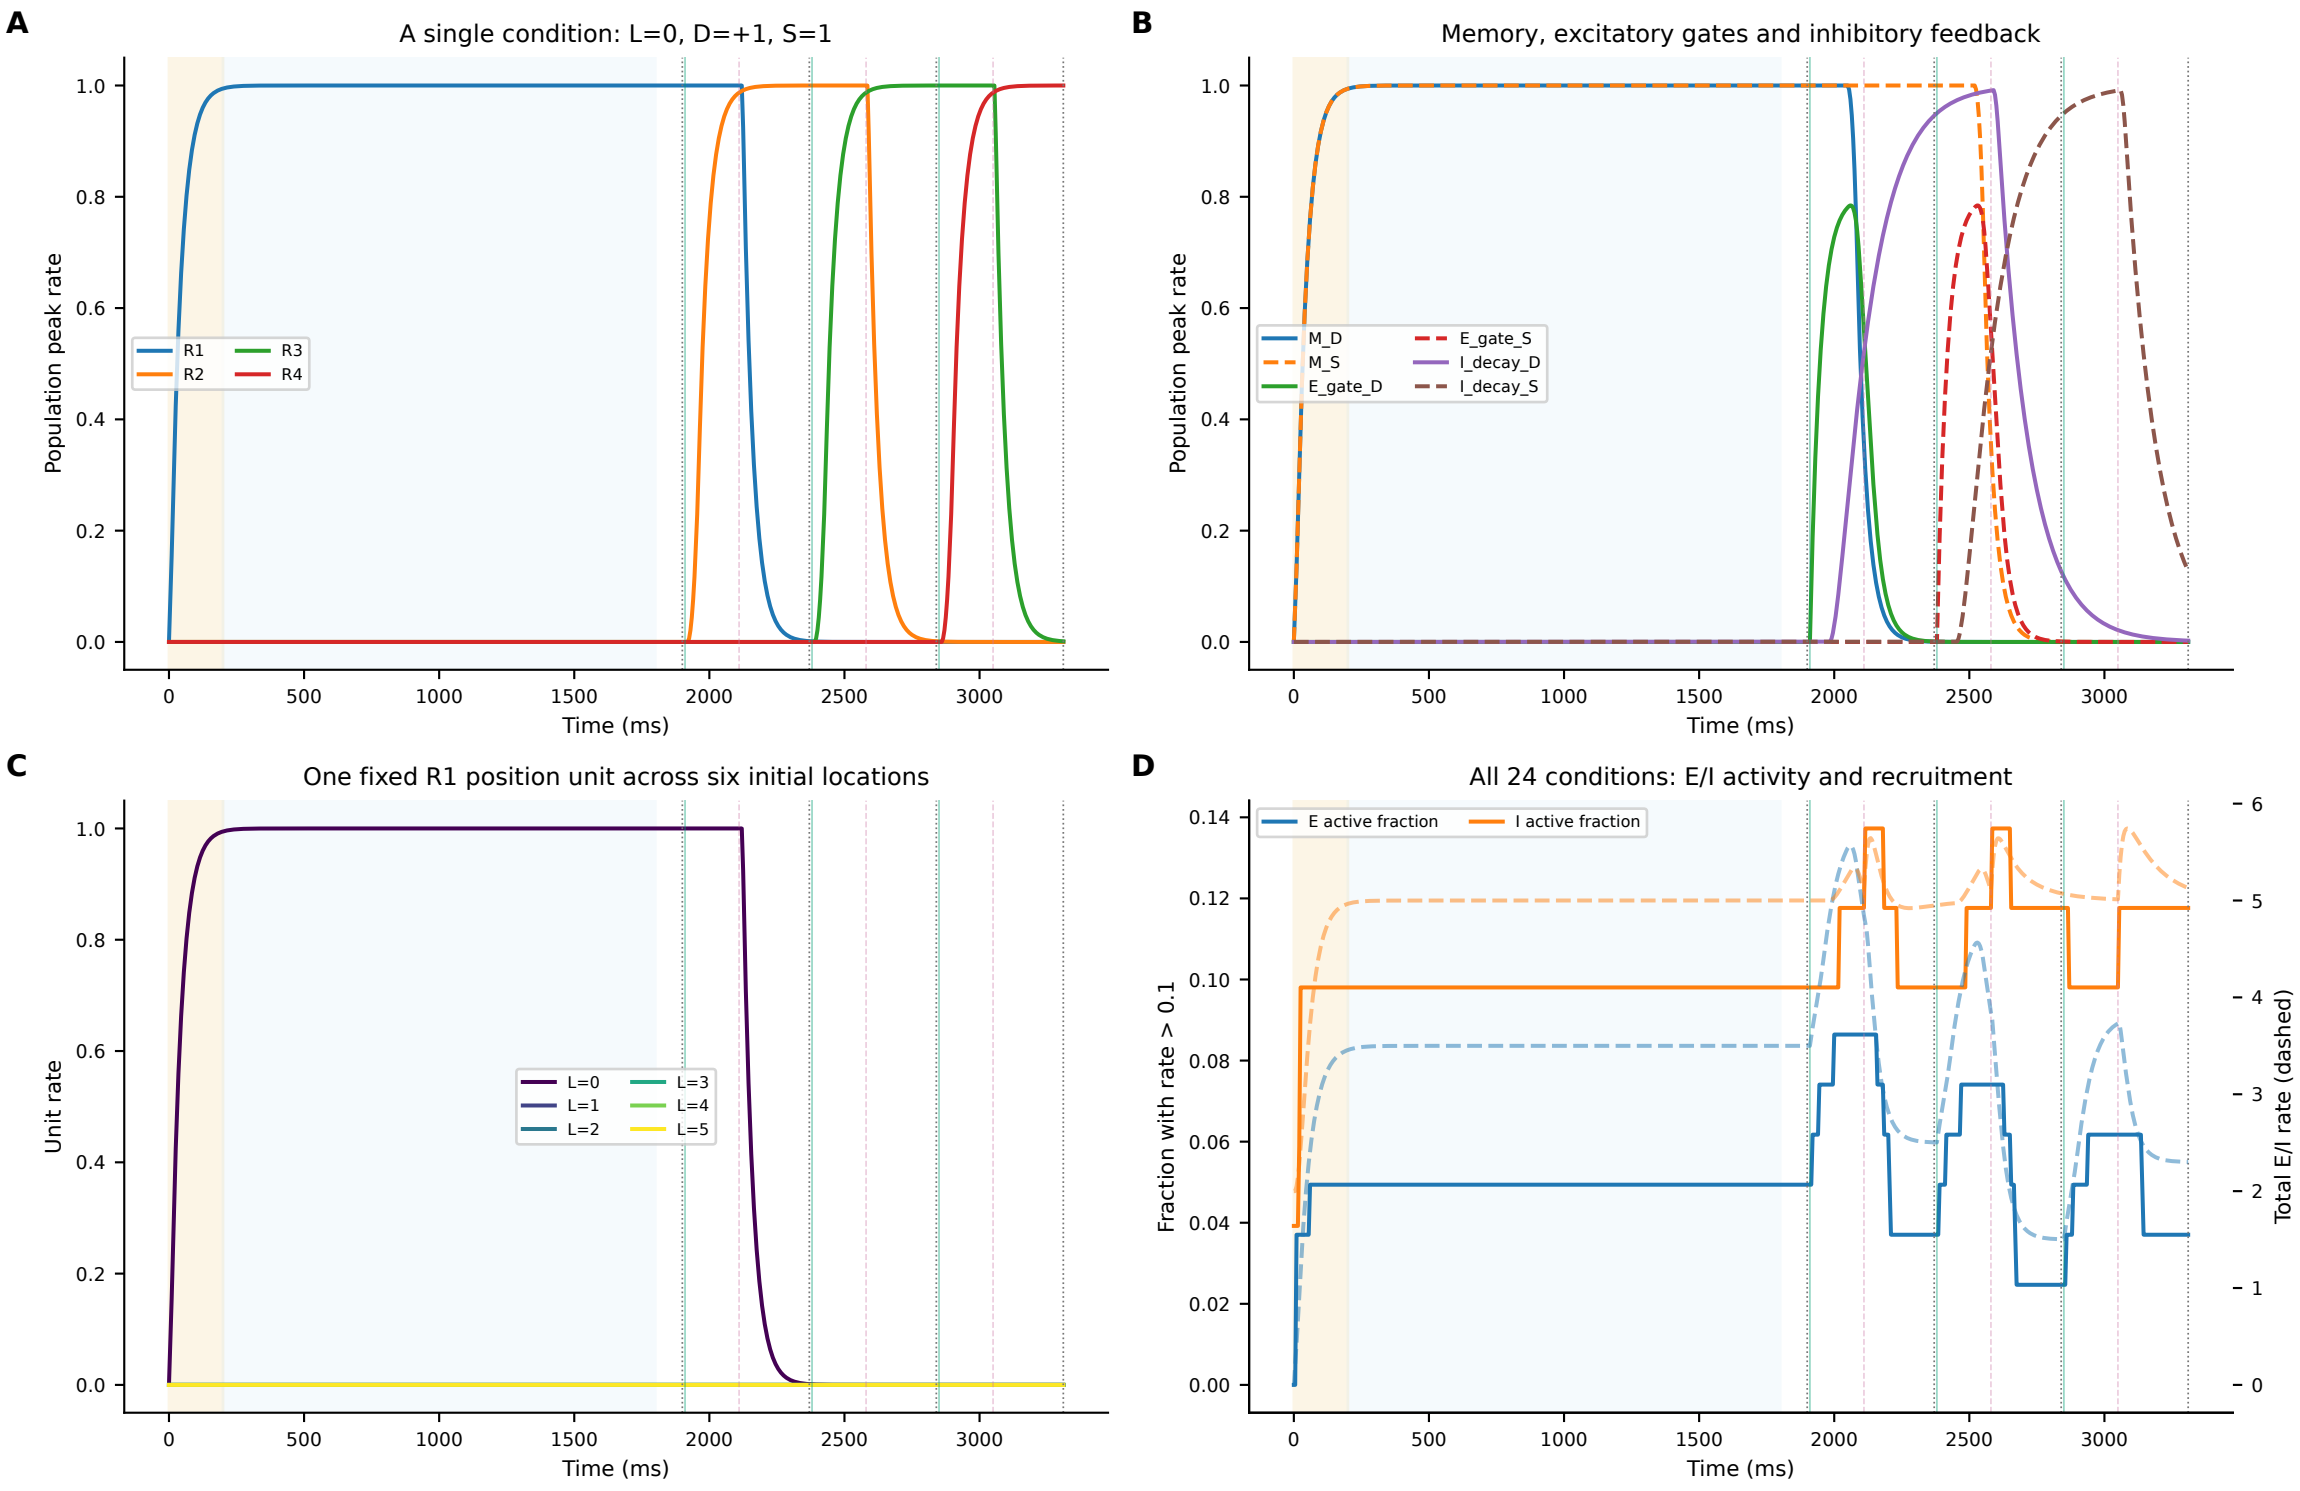

Figure 1 | Temporal organization of the fixed E/I network | ring
A
A single condition: L=0, D=+1, S=1
Population peak rate
Time (ms)
R1
R2
R3
R4
B
Memory, excitatory gates and inhibitory feedback
Population peak rate
Time (ms)
M_D
M_S
E_gate_D
E_gate_S
I_decay_D
I_decay_S
C
One fixed R1 position unit across six initial locations
Unit rate
Time (ms)
L=0
L=1
L=2
L=3
L=4
L=5
D
All 24 conditions: E/I activity and recruitment
Fraction with rate > 0.1
Total E/I rate (dashed)
Time (ms)
E active fraction
I active fraction
