2D Topology | Figure 8 — six R3 states, D=-1, S=2; full132 dynamics
A
Six equilibria in one R3 branch
Endpoint PC2
Endpoint PC1
L=0
L=1
L=2
L=3
L=4
L=5
B
Real full-state-kick trajectories
Same endpoint PC2
Same endpoint PC1
C
Full132 field residual
max |f(r*)| (rate / ms)
Initial location L
D
Representative kink slope 0.5 + certificate
6/6 piecewise-cascade certificates
Clip kink units: 13,13,13,13,13,13
Maximum Re λ (1/ms)
Euler spectral radius
Initial location L
E
Full-state-kick recovery with identity
Recovered fraction of 3 fixed directions
Actual whole-network state-kick RMS
